IN MILADY'S BOUDOIR

BY GWEN SEARS.

THE AFTERNOON NAP.
Some women believe that in order to properly secure a little nap during the warm afternoon, it is necessary to disrobe entirely and open up the bed which has been neatly made for the day.

This takes time and disturbs the neatness of the bedroom, so that when the sleeper gets up, much work has to be done to make it appear as it should. Other women lay themselves down, just as they are, in more or less stiff corsets, uncomfortable clothes, and with the hair dressed neatly and firmly, which comfortable pillow in the world.

In hot weather, this latter way of taking a nap is apt to leave the sleeper wet with perspiration, weak with nervousness. I would recommend a compromise between these two methods, avoiding the undesirable features of both.

If one has not sufficient time to disrobe to lie back in a large easy chair and relax every muscle. Have the room darkened and let it be understood you are entitled to fifteen minutes rest without interruption.

Even this short time will refresh you, if all care and worry are banished for the time. If the house is very warm and the would-be napper is hot, she should open the windows, I counsel her to remove all her clothing and with a towel wrung from tepid water give the body a gentle rubbing, drying well afterwards with a rough towel or two.

A little talcum powder is pleasant, used after such a sponge bath. Alcohol put into the water from which the towel is wrung also adds to its coolness if one does not object to its characteristic odor. Then the negligence and the siesta will be found pleasant and comforting.

What the French Maid Told Marjorie

BY JANE LOWELL

By Elane Boileau.
"I am afraid I didn't give the house a very thorough spring house-cleaning," sighed Marjorie, "and I know that means a really truly cleaning time this fall."

"I should think so," responded Marie, "but don't be so sorrowful about it, for with proper appliances house cleaning is not such an awful job. The first important step in planning the cleaning is to see that proper utensils are on hand. The vacuum cleaner is of course very desirable to possess. If one cannot afford to own a good cleaner it is possible to rent one or to purchase one. Brushes, mops, cloths, brooms, come next in order. There are so many attractive and useful brushes and cloths on the market that one is almost at a loss to know just which ones to purchase. If the income is limited it is better to invest the money in a good carpet sweeper,

stepladder, vacuum cleaner, than in small conveniences.
"The clever housewife who gives some thought to the matter can devise many useful and helpful little contrivances that are as efficient as the ones that can be purchased.

"Every housewife should be supplied with a good chamois skin, plenty of floor and cleaning cloths. Oftentimes old clothes about the house will supply all needs, but there are some that render more satisfactory service than any cloth that the housewife can devise.
"If a radiator brush is not within the means of the pocketbook a very convenient cleaner can be made out of a long slim curtain rod, covered with cheese cloth and dipped in kerosene oil and allowed to become dry in the open air.

"Every housewife should own a self wringing mop, and a dust pan with a lid on that will spring closed as soon as the dust is brushed upon the pan."
